

Dome Valve Actuator

Dome valve actuators are easily interchangeable with any imported, any make dome valve & Chinese valve. Actuator construction is simple and reliable changing the straight motion into rotational motion. That is why actuator has less wearing parts. Large bearing surfaces are securing long life cycle. Actuator functions are exact and clearance-free.

Actuator type

- Single acting
- Double acting

Technical specification

- Max operating pressure - 1 MPa (10 bar)
- Operating media - Air, neutral gas
- Operating Temperature : -10 Drg C - +100 Drg C
- Spring return - Coil springs
- Rotary : - 90 Drg (- +2drg)
- Torque - upto 600 N-m
