

ASH INTAKE VALVE / MATERIAL HANDLING VALVE MHV

Ash intake valve Used to intake ash from hopper into a vacuum conveying system. An ash intake valve mounts directly below the hopper outlets. The modular design allows the same valve to be used regardless of hopper outlet or conveying line size. The ash intake valve is cylinder operated with a manual override feature which allows for local operation of the valve without applying electric power to the system.

Size : up to 300 NB conveying line with custom end connection & adapters

Applications :

- Cement plants
- Power plants
- Ash handling systems
